Eclipse Case-to-Counter Conversion Kit Wrap Design Specifications:

77.5"

29.75"

27.75"   22"   27.75"
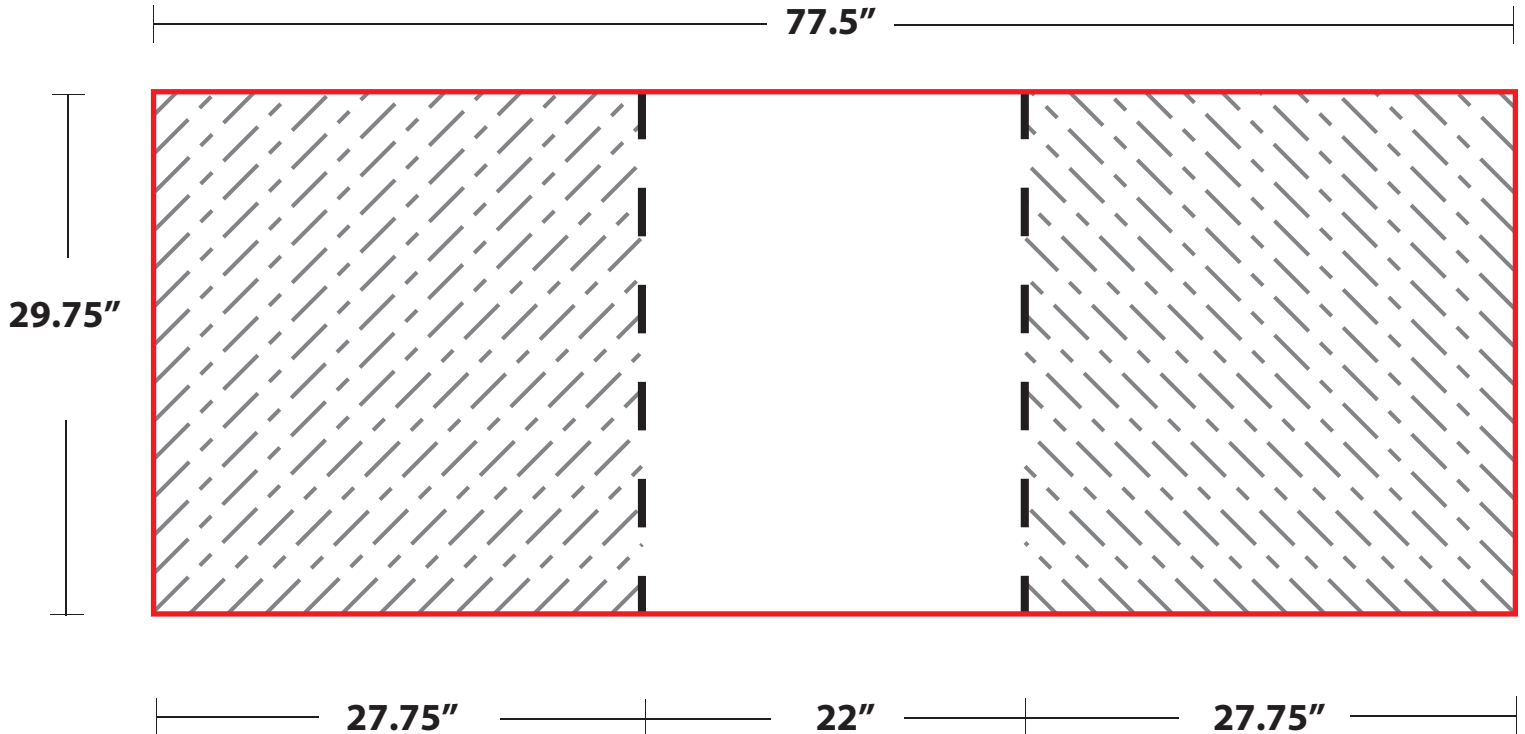

*The hatched area is the area that wraps around the sides and behind the case,
and is not visible from directly in front.

1. Design at full size using the dimensions shown.
2. Design in CMYK. Do not use spot or Pantone colors. We do not provide color matching. Our printed output is generally 95% color accurate. Create Photoshop files at 100 dpi.
3. We recommend that placed images be 75dpi at full size if possible. Image resolutions over 100dpi are unnecessary. Avoid using low resolution images.
4. Remove unnecessary or hidden layers. Provide only what is to be printed.
5. We accept LZW TIF, JPEG, PSD (CS6 or lower), and AI (CS6 and lower) files.

PHOTOSHOP is our recommended design program. To set up your file in Photoshop:
> Create a new **cmyk, 100 dpi** file that is **77.5" x 29.75"**.
When done, save your psd file for future reference, then flatten all layers and save the file as a 100dpi, cmyk TIF with LZW compression and submit the tif file to us.
